**SAN DIEGO FUTURES FOUNDATION ANNOUNCES THE QUALCOMM
EXTREME TECHNOLOGY MAKEOVER PROGRAM 2009**

San Diego, CA – March 26, 2009 - The San Diego Futures Foundation (SDFF) a 501(c) 3 nonprofit organization, announces the return of one its most popular programs, the Extreme Technology Makeover sponsored by Qualcomm Inc., with assistance from the Cubic Corporation Contributions Committee.

The Qualcomm Extreme Technology Makeover Program 2009 will offer free technical services and upgrades to four lucky San Diego nonprofit organizations. The makeovers may include technical services, computers, software, planning, support and consulting provided at no cost to the selected nonprofit organizations. Extreme Technology Makeovers will be awarded through a competitive process.

SDFF's objective is to provide "extreme" makeovers to nonprofit organizations with critical technical issues, and lack the funding to address them. Inefficient and outdated technology can ultimately impact an organization's ability to provide services. To qualify, an agency must be a 501c3 nonprofit organization that serves San Diego County and submit an application available on the SDFF website, www.sdfutures.org by April 20, 2009

"The Extreme Technology Makeover Program allows us to give back to the San Diego community in a meaningful way," said Allison Kelly, Senior Manager of Corporate Giving, Qualcomm. "Though this program, several nonprofits will reap the immediate benefits of improved technology infrastructure and training, but the ultimate benefactors will be the individuals who rely on these organizations for support."

Extreme Technology Makeover (cont.)

Chartered to make information technology available to the broadest range of San Diego County residents through the delivery of hardware, software, communications, training and education, the San Diego Futures Foundation is enabling a broader range of citizens to access technology resources. Located in City Heights, the San Diego Futures Foundation fulfills its mission by addressing three primary areas in the San Diego community: access to technology, youth training, and technical services for nonprofit organizations.

To date, the San Diego Futures Foundation has donated more than 20,000 computers and over 19,500 hours of technical services to San Diego's nonprofits, community-based organizations and schools.
